BLACK TITANIUM INSTRUMENTS

Our black titanium instruments are enhanced in strength and durability up to 3 times more than the ordinary tips. It is highly hygienic as it protects the instruments from virus infection. It is easy to clean and requires less sharpening than other instruments.

The titanium provides the surface of the instrument to be a special non-stick design.

For bone spreading for implant.

The diagrams illustrate various osteotome designs for bone spreading. They are categorized into three main groups based on their handle shape: STR (straight), CVD (curved), and CVD (curved). Each group is further divided into 'convex' and 'concave' tip types. The tools are labeled with their model numbers and dimensions. A vertical scale on the right of each sub-row indicates lengths of 6 mm, 8 mm, 11 mm, and 15 mm.
